***More on the Progeny from the
(M. Washington x Golden Era)
Intersectional Cross***

by D. R. Smith

As discussed in the previous newsletter (V31, N2), the intersectional hybrids resulting from the Martha Washington x t. p. Golden Era cross are turning out to be of exceptionally high quality. This is extremely noteworthy, since this is also the easiest (i.e., most productive) cross for producing intersectional hybrids as well. Most remarkable and surprising is the high

percentage of doubles resulting from this mating. Unfortunately, I stopped using Golden Era as a pollen parent several years ago, for fear that its single flowers would severely limit the chances of producing double-flowering progeny. Based on the results obtained thus far, this concern appears to have been unfounded. Consequently, I will return to using G.E. (A-199) again this coming season. On the plus side, however, I already have a large number of hybrids from this combination, most of which will have bloomed by the spring of 2002.

Photos of the flowers from several more of the M. Washington x G.E. offspring are shown on pages 2 & 5. For color versions of these photos, see the website.

Seedling # IC-93-21, Parentage: (Martha W. x Golden Era)

Seedling # IC-92-03, Parentage: (Martha W. x Golden Era)

Important Notice to Pæonia subscribers

The next issue (V31, N4) of Pæonia will be the last issue of the newsletter that will be distributed by regular mail. Pæonia will continue to be published only as an on-line newsletter and as such will be available to all free of charge. The website address is www.paeonianewsletter.com or www.paeonia.info Both addresses get you to the same place. If you would like to be on my e-mail list and receive a notice whenever a new issue of the newsletter is published on-line, please send me your e-mail address at paeonianews@aol.com. If you prefer a hard copy of the newsletter to read and save, you can simply print it out on your own printer from the universal pdf file. It will look exactly like the ones you have been receiving through the mail with the exception of the folds. I apologize to those who are not yet on-line and therefore, will be unable to receive the newsletter as a result of this decision.

As a result of this decision, I will no longer accept money for new subscriptions. Those who have recently subscribed or re-subscribed and would like to receive a refund, please send me a note (by regular mail or e-mail) and I will try to return the appropriate amount that is due to you. To everyone else, I will simply apply what remains of your subscription to the considerable costs I have incurred in building the Pæonia website. Thank you all for your continued support.

There are a number of reasons that have prompted this decision. First, it has become increasingly difficult to keep up with the tasks of publishing a quarterly mailed-out newsletter. (especially stuffing and stamping envelopes, etc.). More importantly, however, is the very high cost of color copying. Increasingly, it is my strong desire to include more and more color photos showing the results of my own and others hybridizing efforts. However, it is simply much too expensive to make color copies on a regular basis and “publishing” these pictures in black-and-white is very unsatisfying. In addition, it is my perception that nearly everyone, at this point, is on-line and therefore, switching to an on-line service would not pose a problem to the vast majority of Pæonia’s readers. This being said, if you are one of the few who will be cut-off by this decision, send me a note and I will try to send your copy by regular mail for as long as I can.
