

# 2020 APS Available Seed List

## *P. lactiflora* Seed (10-50 seeds/packet; \$2.00/packet)

*Paeonia lactiflora* cultivars are the most common group of herbaceous peonies and are best known their fragrance, cut flower properites and ease of growth. Seeds generally take 4 to 7 years to become flowering size. For more information on this group and other peonies visit the APS website's many resources. For reference, the [Peony Registry](#), found on the APS website, has many images of cultivar flowers occuring in the list below.

### Flower Forms

Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
○ Adolphe Rousseau	open-pollinated	Red	Double
○ Alexander Fleming	open-pollinated	Pink	Double
○ Alicia Kunkel	open-pollinated	Pink	Japanese
○ Anne-Christine	open-pollinated	White	Japanese
○ Beautiful Senorita	open-pollinated	Pink	Japanese
○ Betty Warner	open-pollinated	Red	Japanese
○ Big Ben	open-pollinated	Red	Double
○ Blitz Tort	open-pollinated	Red/White	Cactus/Dahlia
○ Bo Peep	open-pollinated	Pink	Japanese

o Jan Derousse's Seedling #2	open-pollinated	Pink	Bomb Double
o Jan Derousse's Seedling #3	open-pollinated	Pink	Single
o Jan Derousse's Seedling #4	open-pollinated	White	Double

## Herbaceous Hybrid Seed (5-25 seeds/packet; \$2.00/packet)

Herbaceous Hybrid peonies are those arising from hybridization of various species or from crosses of existing hybrids. Flower form, flower size, plant habits and bloom times are highly variable from cultivar to cultivar. Most bloom before *P. lactiflora* cultivars. Unique coloration and other attributes are often seen in this group. Seeds generally take 4 to 7 years to become flowering size. For more information on this group and other peonies visit the APS website's many resources. For reference, the Peony Registry, found on the APS website, has many images of cultivar flowers occurring in the list below.

### Flower Forms

Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
○ Athena	open-pollinated	White/Pink Flares	Single

## Species and Species Cross Seeds (5-15 seeds/packet; \$2.50/packet)

**Peony species' origins are in nature (wild peonies). They are rare plants in nature and in American gardens. Most are small in stature and make excellent rock garden candidates. They all require sharply drained soils with good air circulation, but are among the most interesting and sought after plants in the world. A number of seeds listed this year are seldom available and are in short supply.**

Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
○ <i>P. anomala</i> -herbaceous-	open-pollinated	Pink	Single
○ <i>P. banatica</i> -herbaceous-	open-pollinated	Pink	Single

○ <i>P. tenuifolia</i> -herbaceous-	open-pollinated	Red	Single
○ <i>P. anomala</i> ssp. <i>veitchii</i> (Bremer) -herbaceous-	open-pollinated	Pink	Single
○ <i>P. anomala</i> ssp. <i>veitchii</i> 'Woodwardii' -herbaceous-	open-pollinated	Pink	Single

## Hand Pollinated Species Cross Seed

(1 packet limit; 5 seeds/packet; \$5.00/packet)

Hand pollination provides a degree of assurance as to parents of the seed and possible outcomes in offspring. These types of crosses are not often available due to time and effort required to produce seed. In the case of this cross, high quality parents were involved for both plant and flower traits. *P. mlokoswitschii* (herbaceous peony species) is often considered only yellow in color, however the species occurs with a number color variations in nature. This cross features a light yellow seed parent, pollinated with hot pink selection with darker veining. Offspring are predicted to have a wide range of color variation (yellow, pink, rose, picotee and/or other blends). *P. mlokoswitschii* is one of the gems of the peony world and those who grow it value the beautiful plants for foliage and flower alike.

Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
○ <i>P. mlokosewitschii</i> #3	<i>P. mlokosewitschii</i> 'Buchite'	Ivory-yellow	Single

## Woody Peonies (Tree Peony) Seed -P. suffruticosa & P. rockii lineage- (5-15 seeds/packet; \$2.50/packet)

Woody peonies, often referred to as "Tree peonies" are plants with persistent woody stems. They produce large other worldly flowers and bloom before most herbaceous peonies. Culture is similar to other peonies and are not difficult to grow in USDA Hardiness Zones 4 to 8. P. suffruticosa is a hybrid swarm developed over the millenia in China and furthered in Japan, Europe and the United States. Seeds on this list are mostly from highly sought after Japanese suffruticosa cultivars. Most are historic cultivars and predate peony registration procedures, but a number can be found in the Peony Registry.

Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
o Black Garnet	open-pollinated	Dark Red	Single
o Hana-kisoi	open-pollinated	Pink	Semi-double
o Hoki	open-pollinated	Red	Semi-double
o Irojiman	open-pollinated	Pink	Semi-double

○ Xue Hai Bing Xin -rockii-	open-pollinated	White with flares	Single
○ Zi Yan -rockii-	open-pollinated	Dark red	Single-Semi-double

**— INSTRUCTIONS FOR ORDERING SEEDS —**

You must be an American Peony Society Member  
to place a seed order!!!

Non-members can join the American Peony Society through the APS website, before placing their seed order.

All items will be sold on a first come basis.

Send an e-mail to [oldtooltrader@centurytel.net](mailto:oldtooltrader@centurytel.net) with your order. Include your name, mailing address and telephone number.

When your order has been confirmed, you will have two (2) business days to pay for the seeds. Do not pay until your order has been confirmed!

TO PAY VIA PAYPAL

Go to [www.paypal.com](http://www.paypal.com). Click on the Send Money tab and then select Send Money Online. Fill out the following information in the Send Money box.

To: enter [payment@americanpeonysociety.org](mailto:payment@americanpeonysociety.org)

Amount: enter dollar total indicated on your confirmation. USD – US Dollars.

---

## —SHIPPING & PACKAGING COSTS—

---

- **United States orders will be charged a flat fee of \$6.00 per order to cover the cost of packing and shipping.**
  - **Canadian orders will be charged a flat fee of \$10.00 per order to cover the cost of postage and packaging.**
  - **INTERNATIONAL (overseas) orders will be charged a flat fee of \$15.00 for 1-50 packs of seeds, \$25.00 for 51-200 packs of seeds and \$35 for 201-to 500 packs of seeds per order to cover the cost of postage and packaging. \*International members should research seed import requirements by their respective countries before ordering. New provisions/rules may apply in EU member countries impacting import of seeds. APS can no longer guarantee delivery due to customs' treatment of seeds and is unable to provide Phytosanitary Plant Health Certificates.**
