

# 2021 APS Available Seed List

## *P. lactiflora* Seed (10-50 seeds/packet; \$2.00/packet)

*Paeonia lactiflora* cultivars are the most common group of herbaceous peonies and are best known their fragrance, cut flower properties and ease of growth. Seeds generally take 4 to 7 years to become flowering size. For more information on this group and other peonies visit the APS website's many resources. For reference, the Peony Registry, found on the APS website, has many images of cultivar flowers occurring in the list below.

### Example Flower Forms

Qty	Item #	Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
	1	Adolphe Rousseau	open-pollinated	Red	Double
	2	Albert Niva	open-pollinated	Red	Double
	3	Alexander Fleming	open-pollinated	Pink	Double
	4	Alicia Kunkel	open-pollinated	Pink	Japanese
	5	Anne-Christine	open-pollinated	White	Japanese
	6	Betty Warner	open-pollinated	Red	Japanese
	7	Big Ben	open-pollinated	Red	Double
	8	Bo Peep	open-pollinated	Pink	Japanese
	9	Brand's Magnificent	open-pollinated	Red	Double
	10	Brazzaville (unregistered)	open-pollinated	Red	Single

<b>11</b>	Bric A Brac	open-pollinated	Red/White	Cactus/Dahlia
<b>12</b>	Bunker Hill	open-pollinated	Red	Double
<b>13</b>	Butter Bowl	open-pollinated	Pink	Japanese
<b>14</b>	Candy Stripe	open-pollinated	Red/White	Double
<b>15</b>	Carrara	open-pollinated	White	Japanese
<b>16</b>	Celebrity (unregistered)	open-pollinated	Pink	Japanese
<b>17</b>	Charles Burgess	open-pollinated	Red	Japanese
<b>18</b>	Charm	open-pollinated	Red	Japanese

## Herbaceous Hybrid Seed (5-25 seeds/packet; \$2.00/packet)

Herbaceous Hybrid peonies are those arising from hybridization of various species or from crosses of existing hybrids. Flower form, flower size, plant habits and bloom times are highly variable from cultivar to cultivar. Most bloom before *P. lactiflora* cultivars. Unique coloration and other attributes are often seen in this group. Seeds generally take 4 to 7 years to become flowering size. For more information on this group and other peonies visit the APS website's many resources. For reference, the Peony Registry, found on the APS website, has many images of cultivar flowers occurring in the list below.

### Example Flower Forms

Qty	Item #	Seed Parent	Pollen Parent	Seed Parent Color	Flower Form

## Species and Species Cross Seeds (5-15 seeds/packet; \$2.50/packet)

Peony species' origins are in nature (wild peonies). They are rare plants in nature and in American gardens. Most are small in stature and make excellent rock garden candidates. They all require sharply drained soils with good air circulation, but are among the most interesting and sought after plants in the world. A number of seeds listed this year are seldom available and are in short supply.

Qty	Item #	Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
	<b>183</b>	<i>P. anomala</i> -herbaceous-	open-pollinated	Pink	Single

194	<i>P. tenuifolia</i> 'Kinlen' -herbaceous	open-pollinated	Red or -/+ pink	Single
195	<i>P. anomala ssp. veitchii</i> (Bremer) herbaceous-	open-pollinated	Pink	Single
196	<i>P. anomala ssp. veitchii</i> 'Woodwardii' -herbaceous-	open-pollinated	Pink	Single

## Hand Pollinated Species Cross Seed

(1 packet limit; 5 seeds/packet; \$5.00/packet)

Hand pollination provides a degree of assurance as to parents of the seed and possible outcomes in offspring. These types of crosses are not often available due to time and effort required to produce seed. In the case of this cross, high quality parents were involved for both plant and flower traits. *P. mlokosewitschii* (herbaceous peony species) is often considered only yellow in color, however the species occurs with a number color variations in nature. This cross features a light yellow seed parent, pollinated with hot pink selection with darker veining. Offspring are predicted to have a wide range of color variation (yellow, pink, rose, picotee and/or other blends). *P. mlokosewitschii* is one of the gems of the peony world and those who grow it value the beautiful plants for foliage and flower alike.

Qty	Item #	Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
	197	<i>P. mlokosewitschii</i> #3	<i>P. mlokosewitschii</i> 'Buchite'	Ivory-yellow	Single

# Woody Peonies (Tree Peony) Seed -P. suffruticosa & P. rockii lineage-

(5-15 seeds/packet; \$2.50/packet)

Woody peonies, often referred to as "Tree peonies" are plants with persistent woody stems. They produce large other worldly flowers and bloom before most herbaceous peonies. Culture is similar to other peonies and are not difficult to grow in USDA Hardiness Zones 4 to 8. P. suffruticosa is a hybrid swarm developed over the millenia in China and furthered in Japan, Europe and the United States. Seeds on this list are mostly from highly sought after Japanese suffruticosa cultivars. Most are historic cultivars and predate peony registration procedures, but a number can be found in the Peony Registry.

Qty	Item #	Seed Parent	Pollen Parent	Seed Parent Color	Flower Form
	198	Black Garnet	open-pollinated	Dark Red	Single
	199	Benikasane	open-pollinated	Reddish/Purple	Single

**— INSTRUCTIONS & TERMS FOR ORDERING SEEDS —**

- 1) **Eligibility:** You must be an American Peony Society Member to place a seed order. Non-members can join the American Peony Society through the APS website, before placing their seed order.
- 2) **Availability:** All items will be sold on a first come - first served basis.
- 3) **TO ORDER:** Fill in order form on seed page and submit on website or scan the list with selections then email it or email your own list to >>>
 

3a) Send an e-mail to <a href="mailto:oldtooltrader@centurytel.net">oldtooltrader@centurytel.net</a> with your order. Include your name, mailing address and telephone number >>>	3c) <a href="#">Send Email to Seed Chair</a>
---	--
- 4) **Order Received Confirmation:** The Seed Program Chair will send an order received confirmation email (allow up to a week). DO NOT MAKE PAYMENT at this time.
- 5) **Inventory Confirmation:** The Seed Program Chair will send an order inventory confirmation email after reviewing inventory (allow 2 to 3 weeks). This confirmation will include balance due (seeds, shipping & handling).
- 6) **Payment:** After inventory confirmation is received, make payment within 5 business days.
- 6a) **Pay Option 1:** Pay with PayPal:  
 Go to [www.paypal.com](http://www.paypal.com). Click on the *Send Money* tab and then select *Send Money Online* . Fill out the following information in the *Send Money* box:
  - To : enter [payment@americanpeonysociety.org](mailto:payment@americanpeonysociety.org)
  - Amount: enter dollar total indicated on your confirmation. USD – US Dollars.
  - For: select "I'm sending money for goods and services...Select Continue and move to next screen
  - Choose Shipping Address: Fill in your address...Select "OK"
  - Subject: Enter SDP
  - Send Money •
 The APS Treasurer will send a payment confirmation within a week. **Seed orders will be shipped within 3 weeks; or in the fall upon request or necessity.**
- 6b) **Pay Option 2:** Pay with check or money order.
  - Mail to: Kris Jurik APS-SDP, 5658 195th Street, Ames IA 50010-9239 USA

**—SHIPPING & PACKAGING COSTS—**

- **United States:** \$7.00 S&H; **Canada:** \$12.00 S&H
- **International** (overseas): \$17.00 for 1-50 packs of seeds, \$27.00 for 51-200 packs of seeds and \$40 for 201- to 500 packs of seeds S&H. \*International members should research seed import requirements by their respective countries before ordering. New provisions/rules may apply in EU member countries impacting import of seeds. APS does not guarantee international delivery due to customs' treatment of seeds and is unable to provide Phytosanitary Plant Health Certificates.
