

APS Website Report

11/2020

Nate Bremer

The website continues to be updated as new information is submitted to me. The Peony Registry continues to be the most heavily used component of the website with many worldwide users. Many new images have been added to existing records –thanks to David Buzzel, Derek Halford and Roy Klehm. Thanks go to Reiner and Adriana for vetting images. Adriana does the image formatting and then I load them into the records when ready- thanks Adriana for cleaning up rather poor images .

Scott Parker and I will be looking at some product options for purchasing seeds online. At this time there are a number of steps which often require too much back and forth between members wishing to purchase seeds and Scott. We are hoping to make seed purchase more automated so the process runs more smoothly.

Committees and BOD who would like information posted should contact me with images and pieces they would like posted. It doesn't generally take me long and winter is here (meaning I've got a bit more time for this type of thing).
