

## 2021 Nomenclature Report

Submitted by Reiner Jakubowski – Registrar

October 8, 2021

As of October 8, there are 115 registrations either completed or in the works.

Breakdown by country.....

USA	68
China	33
Germany	4
Sweden	4
Italy	2
Ukraine	2
Canada	1
Netherlands	1

A few deserve comment;

**China:** Most registrations from China come from agricultural and botanical research institutions. Some of the ones this year came from individual enthusiasts. One of these persons has been importing seeds from North America, which shows up in the stated parentage ('Mary Pratte'). 'Mary Pratte' is a Canadian introduction, named for the 3<sup>rd</sup> president of the Canadian Peony Society.

**Germany:** A couple of introductions from Germany have as parentage 'Bartzella' x 'Lemon Chiffon'. These do not look at all like your typical Itoh. One of them shows evidence of woody peony heritage in that it has a partial sheath and foliage intermediate between its parents. Some pollen fertility in both of them but only one of them has produced a few seeds.
